

Guideline For XBeauty

1. Add Sign Up Phone Number Field Requirement

Go to:

`\wp-content\plugins\masterstudy-lms-learning-management-system_core\lms\classes\user.php`

Function: `stm_lms_register()` line 224

Go to:

`$fields = array()`

Add: phone number field

```
'register_user_phone_number'      => array(
    'label' => esc_html__( 'Phone number', 'masterstudy-lms-learning-
management-system' ),
    'type'  => 'number',
),
```

Go to: Line 340

Add: `@var $register_user_phone_number ;`

2. Change Email Field To Not Require

Go to:

`$fields = array()`

Delete: `register_user_email` // or just comment it out

3. Change Interface

Go to:

`\wp-content\plugins\masterstudy-lms-learning-management-system_core\stm-lms-templates\components\authorization\register-form.php`

Add:

```
<div class="masterstudy-authorization__form-field">
    <input type="text" name="register_user_phone_number"
class="masterstudy-authorization__form-input" placeholder="<?php echo
esc_html__( 'Enter your phone number', 'masterstudy-lms-learning-management-
system' ); ?>">
</div>
```

4. Take Value From Input Box

Go to:

`\wp-content\plugins\masterstudy-lms-learning-management-system_core\assets\js\components\authorization\ajax.js`

Var register_data = { } line 158

Add:

```
register_user_phone_number: formContainer
    .find('input[name="register_user_phone_number"]')
    .val(),
```

Note: If modify in live website not in local development. The file must be cut and modify by ajax.js file that have been modified in the local development because it will be not working by just add code to the file in the live website.

5. Save Phone number to database

Go to:

Line 410

`\wp-content\plugins\masterstudy-lms-learning-management-system_core\lms\classes\user.php`

```
400
401
402
403     if (!empty($response['errors'])) {
404         return wp_send_json($response);
405     }
406
407     $premoderation = STM_LMS_Options::get_option('user_premoderation', false);
408
409     /**Now we have valid data*/
410     $user = wp_create_user($register_user_login, $register_user_password, $register_user_email);
411     if (!is_wp_error($user)) {
412         update_user_meta($user, 'register_user_phone_number', $register_user_phone_number);
413     }
414
415
```

```
if (!is_wp_error($user)) {
    update_user_meta($user, 'register_user_phone_number',
$register_user_phone_number);
}
```

Go to:

Line 486

Add:

```
update_user_meta($user, 'register_user_phone_number',
$register_user_phone_number);
```

```
}
```

6. Add Phone Number To User Profile

Go to:

`\wp-content\themes\masterstudy-lms-starter-child\functions.php`

Add:

```
function add_phone_number_field($user)
{
    ?>

    <h3>Phone Number</h3>

    <table class="form-table">

        <tr>

            <th><label for="register_user_phone_number">Phone Number</label></th>

            <td>

                <input type="text" name="register_user_phone_number"
id="register_user_phone_number" value="<?php echo esc_attr(get_user_meta($user-
>ID, 'register_user_phone_number', true)); ?>" class="regular-text" />

            </td>

        </tr>

    </table>

<?php
}

add_action('show_user_profile', 'add_phone_number_field');
add_action('edit_user_profile', 'add_phone_number_field');

function save_phone_number_field($user_id)
{
    if (current_user_can('edit_user', $user_id)) {

        update_user_meta($user_id, 'register_user_phone_number',
sanitize_text_field($_POST['register_user_phone_number']));

    }
}
```

```
}  
add_action('personal_options_update', 'save_phone_number_field');  
add_action('edit_user_profile_update', 'save_phone_number_field');
```
